Aroma Diffuser Machines

We provide a selection of different automatic aroma diffuser machines that are suitable for various applications. Some applications where these machines have been used is to help promote a new product or service in a hotel, shop, restaurant, business, theme parks, car show room, property sales, spa's, swimming pools, gymnasiums and many more applications.

Smellitzer™ 008

Easily covering upto very large rooms, halls, theatres, cinemas, conference rooms, shopping centres and larger hotel reception areas amongst other application up to an area of 8000 m3.

The machine is programmable, so it automatically turns on during business hours and off out of hours. The amount of fragrance that the machine outputs can be adjusted to suit your space and area. Just fill the machine's 1L bottle, set the times and program requirements and let it fill the area with your fragrances.

The Smellitzer 008 uses advanced nano-droplet technology. The essential oil particles will not be attracted to cold surfaces and will dissipate in the air better and more evenly throughout the area.

The unit is powered by a larger, more powerful pump to allow a larger air flow and scent a greater area.

The bottle is easily refilled with fragrance oil (use only suitable fragrance oil for the machines), the container is protected by a lockable cupboard.

Machine Features:

Model Name:	Smellitzer™ 008
