# Aroma Diffuser Machines

We provide a selection of different automatic aroma diffuser machines that are suitable for various applications. Some applications where these machines have been used is to help promote a new product or service in a hotel, shop, restaurant, business, theme parks, car show room, property sales, spa's, swimming pools, gymnasiums and many more applications.

## Smellitzer™ X3

Easily covering rooms, halls and reception areas amongst other applications up to an area of 400m<sup>3</sup>.

The machine is programmable, so it can be set to automatically turn on during business hours and off out of hours. The amount of fragrance outputted can be adjusted to suit your space and area. Just fill the machine's 200mL bottle, set the times and program requirements and let it fill the area with your fragrances.

The unit is controlled by an easy to use soft touch control panel which will allow you to customise and program the hours of operation and the dosage of fragrance you would like out of the machine.

The fragrance oil bottle is protected by a lockable door on the top of the unit. We recommend using our own specially formulated fragrance oils for these machines as to not damage the dosing nozzle.
